

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our quality time at home. We used to receive 5-10 annoying telemarketing calls EACH day, usually at dinner time. Now, since the implementation of Indiana's Telephone Privacy law, we no longer receive those calls. We were about to have our telephone service discontinued and use only our cell phone to avoid the telemarketing calls. We decided to see if the Telephone Privacy law would work for us, and it did. Please DO NOT diminish the protections we receive from Indiana's Telephone Privacy law. The telemarketing calls were an invasion of our privacy and VERY annoying during our valued family time! We do not want to receive unwanted telemarketing calls. Thanking you in advance for your consideration. Kenneth & Debra Berry
